I-2/I-3 Occupancies	X	Lorin Neyer 02-14-06			
		John Donelan			

MEETING NOTES:

1. Assistant State Fire Marshal Kate Dargan (meeting facilitator) welcomed the attendees. To set the organizational frame for the meeting, Chief Dargan reinforced that the philosophy of the SFM Code Adoption project is to be extremely inclusive of all stakeholders at the beginning of the process --- well before the typical public comment stage. SFM is also encouraging input from many sources which generates additional workload for SFM in processing and collecting these initial recommendations with the expected result being a smoother transition during Summer/Fall 2006 when the Building Standards Commission enters into the full

public comment period. Chief Dargan also confirmed that SFM will send the draft package to the Fire and Life Safety Building Standards Advisory Board in April 2006 for their comments/recommendations prior to SFM submitting the package to the Building Standards Commission in May 2006.

2. Leslie Haberek introduced Doug Thornburg, ICC Director of Product Development, as a highly experienced expert on the ICC as well as other model building codes. Mr. Thornburg then provided the Core Committee with information on the fundamental philosophical precepts of the 2006 IBC and outlined some of the differences between the IBC and UBC.
3. Steve Hart provided the committee members with an outline of the status of recommendations submitted by Workgroup Leaders as of 02-10-06. Following a general discussion, Steve Kiefer led the group in the detailed examination and evaluation of the recommendation package.
4. Because of the complexity of the height/area issues, Chief Ruben Grijalva joined the meeting on 02-14-06 and welcomed additional participation from members of the Area/Height Workgroup via conference call.
5. Next meeting of the Core Committee is scheduled for March 17 in Buellton.
6. Findings of this meeting of the Core Committee resulting from the review of the current recommendation package will be compiled by Steve Hart and Kevin Reinertson and posted on the SFM Website.
